

## CONTENTS.

	PAGE.
CHAPTER I.—THE TOWNS OF THE PAST ... ..	1
<p>The primitive hut. Kahun, 3000 B.C. Egyptian temples. Assyrian city walls. The Greek town and acropolis. Rome and axial planning. Roman colonial towns. The towns of the middle ages. The Renaissance. Axial planning externally, and ordered streets and open spaces in Italy, France, Britain, Germany. Radial planning. Ring boulevards. Washington, its Mall and diagonal avenues.</p>	
„ II.—THE TOWNS OF THE PRESENT AND THE FUTURE ... ..	17
<p>THE CIVIC SURVEY.—Stages of growth. Conditions of soil, subsoil, rainfall, winds, temperature, surface contours, traffic, hygiene, distribution of buildings, open spaces, and improved and unimproved values.</p> <p>KINDS OF TOWNS.—Political capitals, ports, trading, manufacturing, mining, agricultural, and pleasure towns.</p> <p>THE DISTRICTING OF TOWNS.—Subdivision into quarters for trade, manufacture, noxious trades, and residence.</p>	
„ III.—THE HEALTH OF TOWNS ... ..	34
<p>Inferior health of town dwellers. Congestion at work and in the home. Value of sunlight and fresh air. The examples of Letchworth, Port Sunlight, and Bournville. Re-housing at Liverpool pays. Slums in Australian cities. Municipal services, water, sewerage, waste. Swamps. Subsoil. Drainage. Limitation of size of towns. Permissible density of population.</p>	
„ IV.—TRANSPORTATION ... ..	47
<p>Water carriage of goods. Harbours. Docks. The port of Sydney, its advantages and defects. Future developments. Melbourne, Adelaide, Brisbane. Transit to the warehouse quarter. A goods clearing house. Passenger traffic, by ferry, rail, and tram. City railways. New York's solution. Quick and cheap transit essential to town planning. Vehicular traffic. Two-storied streets.</p>	
„ V.—THE ROAD SYSTEM OF TOWNS ... ..	56
<p>Rectangular planning. Radial planning. Main avenues. Curved roads. Grades. Widths. Circumferential roads. Secondary roads. Widths and grades. Narrow and dead-end roads. Back lanes. Sub-division of streets into roadway, paths, tram-tracks, grass. Two-level roads. Road surfaces.</p>	
„ VI.—CIVIC CENTRES ... ..	65
<p>Origins: Greece, Rome, Italy. Examples: Karlsruhe, London, Nancy, Paris, Washington, Chicago and Exposition, Philadelphia, Denver, Cleveland, Seattle, Milwaukee, Boston, Vancouver, San Francisco, London, Bolton, Dundee, Bath, Letchworth, Oporto, Rome, Adelaide, Hobart, Perth, Brisbane, Melbourne, Sydney. The need of a Civic Centre.</p>	
„ VII.—BUSINESS AND RESIDENTIAL CENTRES, SQUARES, AND OPEN SPACES ... ..	81
<p>Lungs in congested quarters. Suburban or country town centres. Commercial, manufacturing, retail trading and market centres. Town and suburban squares or open spaces. Educational, amusement and hotel centres. Shape and character of open spaces.</p>	
„ VIII.—TRAFFIC CENTRES, ROAD JUNCTIONS, STREET SPACING, AND SIZE OF CITY ALLOTMENTS ... ..	90
<p>Traffic centres and collision points, gyratory traffic. Railway station or wharf. Cross-over roads. Cab stands. Rounding corners. The intersection of three, four, or more streets. Acute angles. Irregular intersections. Allotments at right angles to streets. Distance apart of business streets regulated by kind of lighting required to buildings. Subsidiary businesses not requiring street frontages.</p>	

	PAGE.
CHAPTER IX.—SUBURBS AND SUBDIVISIONS ... .. .	98
<p>Method of town extension depends on means of transit. Separated suburbs should not exceed 30,000 population. Differentiation. Industrial suburbs. Defects of existing suburbs. Defects of ordinary subdivisions. Acute angled allotments. Sections of many towns too large. Interiors becoming slums. Roads through subdivisions. The minimum size and shape of allotment. Internal reserves. Larger allotments in country towns and for the well-to-do.</p>	
„ X.—SUBURBS AND SUBDIVISIONS— <i>continued</i> ... .. .	107
<p>External reserves. Size of allotments depends on kind of dwelling. Co-operative dwellings require special allotments. Hillside allotments. Plotting the building on the allotment. Avoid monotony. Curved roads and buildings. Plotting dwellings at intersections of roads affects subdivision. Two, three, and four road intersections. Avoid flank frontages. Allotments for public buildings.</p>	
„ XI.—PARKS AND PARKWAYS ... .. .	122
<p>City, suburban, and national parks. Amount of park space required. Distance apart of parks. Acquire space now for future requirements. How to finance it. The City Park. Hyde Park. Fitzroy Gardens, Melbourne. Suburban parks. Waste lands may be utilised. National parks. Parkways. Porter Brook, Sheffield.</p>	
„ XII.—PLAYGROUNDS, GARDENS, AND TREE PLANTING ... .. .	133
<p>Showgrounds, racecourses, golf courses, sports grounds, drill-grounds, aerodromes. Zoological and Botanic Gardens. Children's playgrounds, Sydney, Adelaide, United States. Distance apart. Small wayside gardens. Street garden plots. Rockeries a mistake. Abolish fences to front gardens. Tree planting in streets, kinds and spacing. Don't mix varieties. Practical planting.</p>	
„ XIII.—CIVIC ÆSTHETICS ... .. .	147
<p>Get rid of ugliness, advertisements, tramway, telegraph, telephone wires and posts, and shop verandahs. Arcades. Artistic treatment of the Civic Centre, the railway station, and ferry wharf approaches. The proper placing of public buildings. Symmetrical or irregular. Bridges. Embankments. Irregular heights of buildings and flank walls. Business structures and factories. Encouraging good design in dwellings.</p>	
„ XIV.—CIVIC ÆSTHETICS— <i>continued</i> ... .. .	158
<p>Monuments. Triumphal arches. Town gateways. Columns. Obelisks. National monuments. War memorials. Statues. Groups of sculpture. Fountains, cascades, and water basins. Tram shelters. Comfort stations. Electric lighting standards and transformers. Minor features. Park and other railings.</p>	
„ XV.—BUILDING REGULATIONS ... .. .	169
<p>In ancient times. Modern encroachments. German building regulations, kinds, heights, amount of open space, &amp;c. Districting—Population density—Light, air, and sunshine. Smoke prevention. Noxious trades. Building lines. Differentiate between town and country. Health, sound construction, and pleasing appearance the aim of regulations. How to attain them. Fire prevention.</p>	
„ XVI.—DRAINAGE, SERVICES, AND ROAD CONSTRUCTION ... .. .	174
<p>Surface drainage. Sewerage. Sewer connections. Water and gas mains, hydraulic power, heating, pneumatic tubes, electric wiring, &amp;c. Complications underground. Channels for services. Subway, Kingsway, London. Access to basements. Ventilation of subways. Overground services at rear of allotments. Underground services in suburbs under grass borders of streets. Screening overhead tramway wires by trees. Other wires and poles on suburban frontage lines. Removal of waste. Destruction by fire.</p>	
„ XVII.—THE IMPROVEMENT OF EXISTING CITIES AND TOWNS ... .. .	180
<p>Re-alignment. France leads the way. Boulevards in place of fortifications. Re-planning Paris in 1793. Napoleon III and Hausmann. Tenement Housing congestion. Growth of London unregulated. Traffic congestion at centre. Traffic Report of Board of Trade in 1911. Housing congestion. Its remedy. Chicago, a bad example of unregulated growth. Drastic re-planning necessary. The problem of Sydney.</p>	

CHAPTER XVIII.—RE-HOUSING ... .. 189

The slums of London. Removal and rebuilding. The Birmingham system of improvement. Garden suburbs a better method. Cheap and quick transit essential. Great increase in cost of building a difficulty. Cheaper building methods. Joint use of services. Minimise accommodation. Standardisation. English v. Australian cottages. Modified flats. Examples. Details. Cottages in other States. Hostels for single men and women. Tenements in cities. Co-partnership suburbs for middle class.

„ XIX.—REALISATION OF TOWN PLANNING AND ITS COST ... .. 201

Civic power and practice in Germany. Town Planning in Sweden and Italy. The British Town Planning Act of 1909. Civic Planning Commissions in the United States. Town Planning Bills in Australia. The proposed Town Planning Commissions. The cost of town planning. Offset by increased values and reduced expenditure in other directions. Compensation for land debarred from building. Municipal land ownership. The cost of re-planning. Excess resumptions. Changing the character of districts. Re-alignment. Combine pre-planning and re-planning.

„ XX.—MUNICIPAL GOVERNMENT ... .. 206

Local government units must carry out town planning. Powers of local government bodies. Limited by Statutory authorities. Efficient city government. Federal or unified. Municipal government in the United States. Inefficient. Commission government. Advantages. The Initiative, Referendum, and Recall. The City Manager. German city government. Unequal franchise. Personnel of Councils. Part elected, part official. French City government. City government in Australia unequal at present to proposed developments. The solution an open question.
