

Coffee Break

Question on Software or Operating system.

Load Outlook Express on Start-Up.

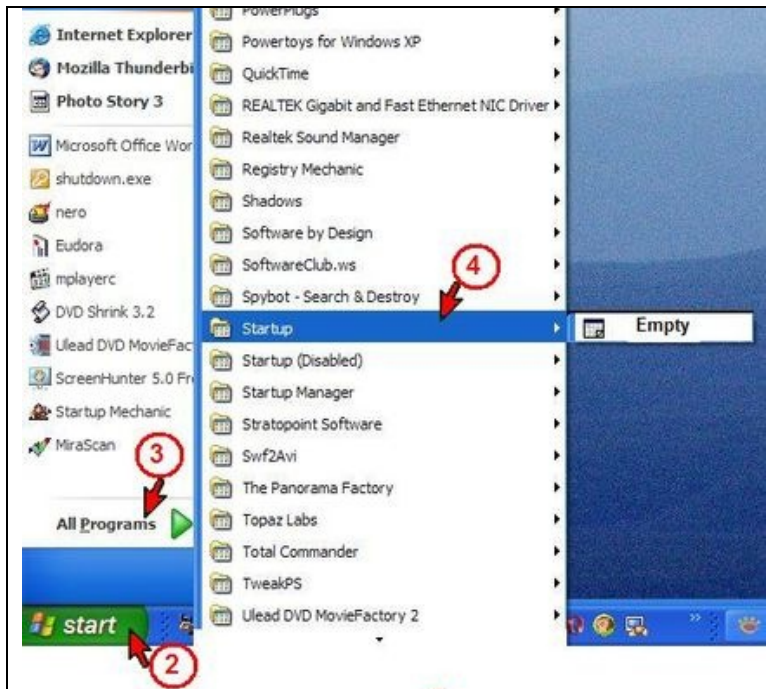

When you start your computer do you check your Email first?

You can have Windows XP open your Email when ever you start your computer.

[1] Right click 'Outlook Express' icon.

Continue to hold down the right mouse button.

[2] Drag it to the [Start] button.

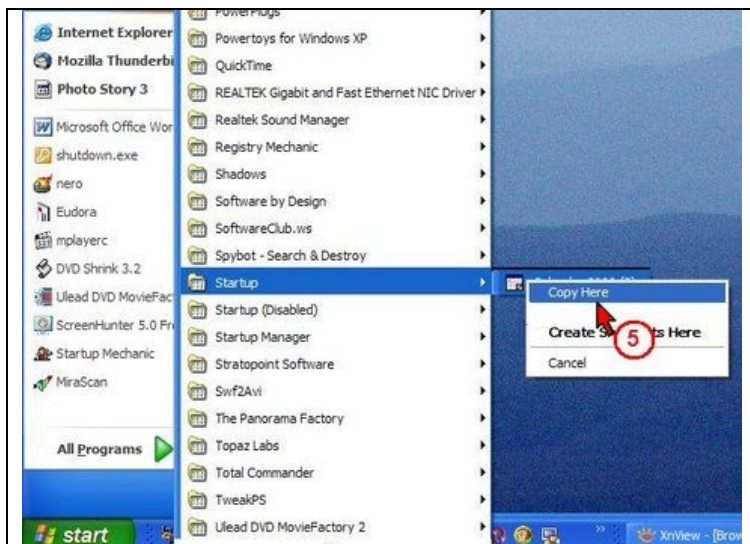

Continue to hold the right mouse button.

[3] Drag the icon over [All Programs]

[4] Your programs list will show.

Move to [Startup] shown in [4].

Hold that right mouse button.

When the small option box opens

[5] Drag the 'Outlook Express' icon there.

Now release the right mouse button.

A small option menu will show (fig [5]).

[5] Left click [Copy Here]

Now when you start your computer Outlook Express will start.
