

Coffee Break

Question on Software or Operating system.

RESIZE SCROLLBARS

If the scroll-bars are too small and you have trouble grabbing them. Then there is a way to change the size of them.

Choose an open space on your desktop and click the right mouse button.

Left click on [Properties]

You'll be presented with a settings screen, select the [Appearance] tab. Then the [Advanced] button.

Click the down arrow.

Move to Scrollbar And select.

You'll be able to increase or decrease the size of your scrollbars by using the little box to the right of the drop down box (it's labeled " size ").
