

Coffee Break

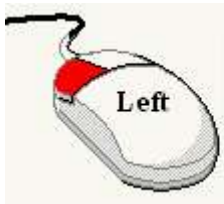

Question on Software or Operating system.

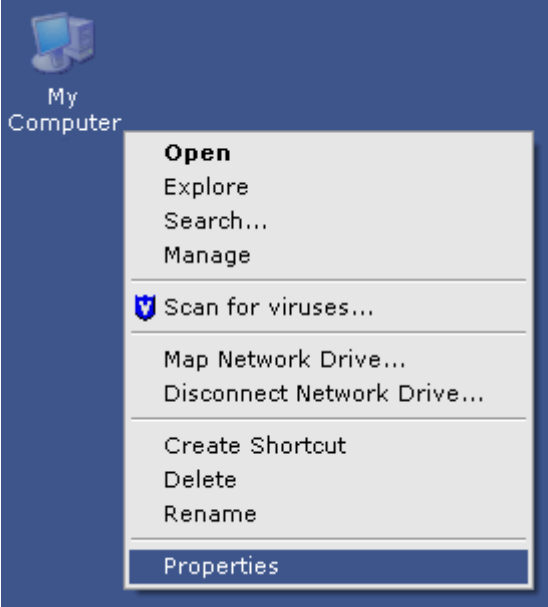

Do I already have Service Pack 2 installed?

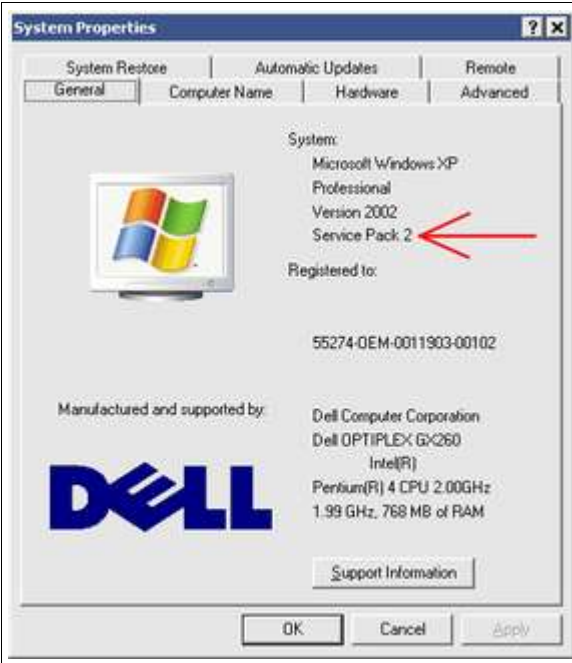

1 Right click the mouse button on My Computer.

Then left click Properties.

Look at the System section, and usually the last line of the System section, it will either say Service Pack 1 or Service Pack 2. If it says Service Pack 2, then your system is already updated. If it says Service Pack 1, then you need to update your machine.

Do I need Windows XP service Pack 2?

Windows XP Service Pack 2 is about security. It will give you tools to easily view, understand, and control the security aspects of your computer. It includes changes in the operating system to nearly every area related to computer and network security.

Also Service Pack 2 is require to run USB 2.0 (High speed Flash Drivers).

Yes Service Pack 2 is required.

Microsoft has issued a list of nearly 50 software applications and games that may encounter problems with its Windows XP Service Pack 2 update. WordPerfect , Symantec Ghost , Symantec AntiVirus , Windows Scanner and Camera Wizard, Visual Studio Just to name a few.
