

Coffee Break

Question on Software or Operating system.

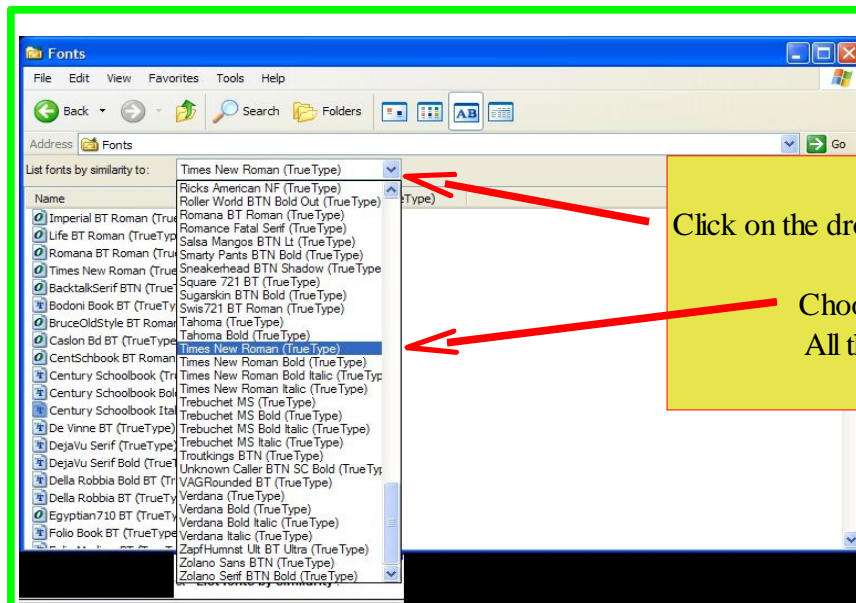

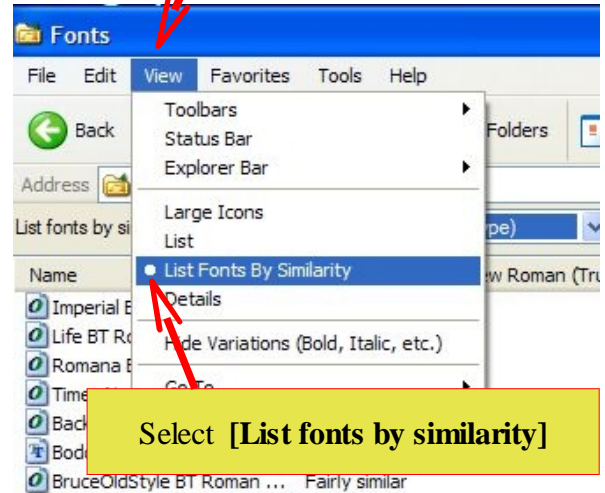

FONTS THAT ARE SIMILAR,

Many fonts are added to your **Font Folder** when installing software, the program may use similar fonts that you all ready have. Here's how to find them and view the font.

Click the **Start** button then click **Control Panel**.

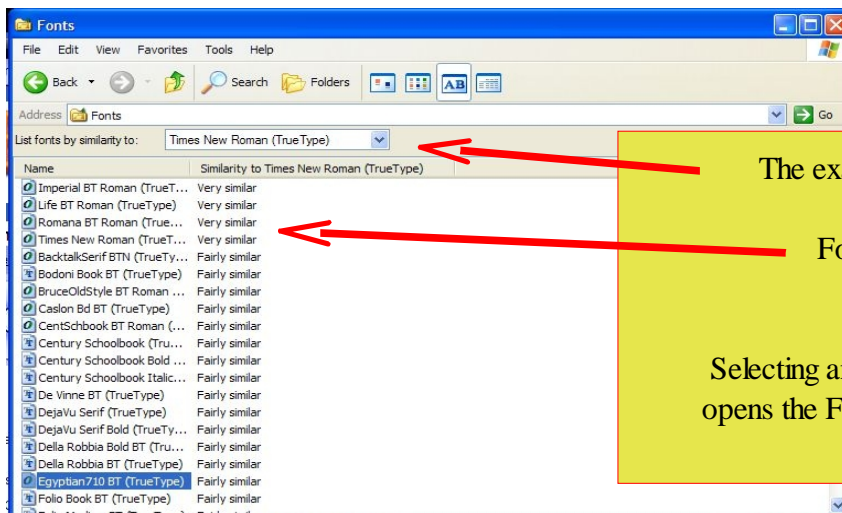

Click the **[View]** menu option.

Click on the drop down arrow to show the Fonts available.

Choose the font you wish to compare.
All the fonts that are similar are listed.

The example here is [Times New Roman]

Four are listed as **Very similar**,
the rest are **Fairly similar**.

Selecting anyone from the list and double clicking,
opens the Font Viewer with an example of the font.
