

# Coffee Break

Question on Software or Operating system.

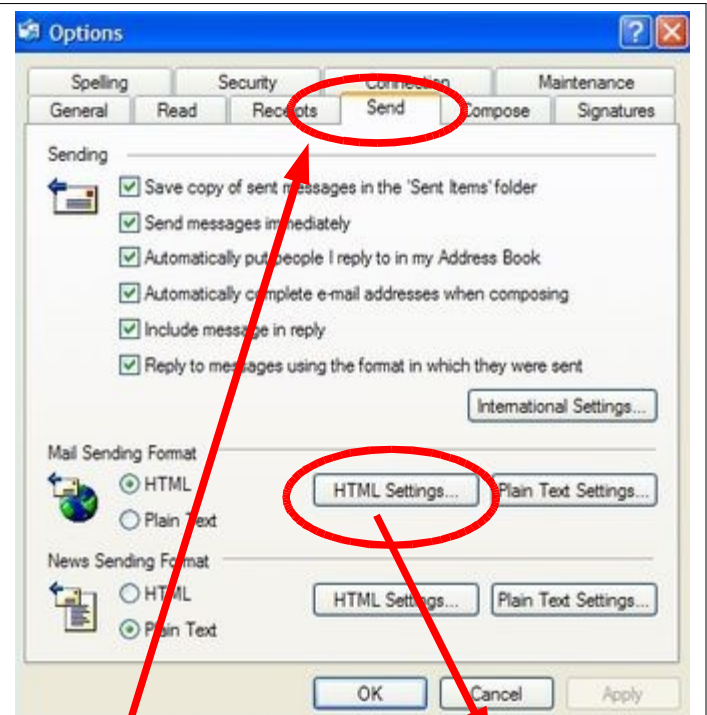

## Stop adding Carets (>>>) to forward E-mail.

Don't you find those little carets ( ">>>" things) on forwarded & replied to e-mails Annoying?

You can set most e-mail clients NOT to put those in if you like. *This way, at least the mail you forward or reply to will be easier to read.*

Open Outlook Express, Click Tools then Options.

Select [Send] tab.

Then [HTML Settings]

Un-check (remove tick) **[Indent message on reply]**.

Click [OK] then [Apply].

**Note: This does not remove carets from E-mail that already has them.**

**It stops adding more to your forward E-mail.**
