

Coffee Break

Question on Software or Operating system.

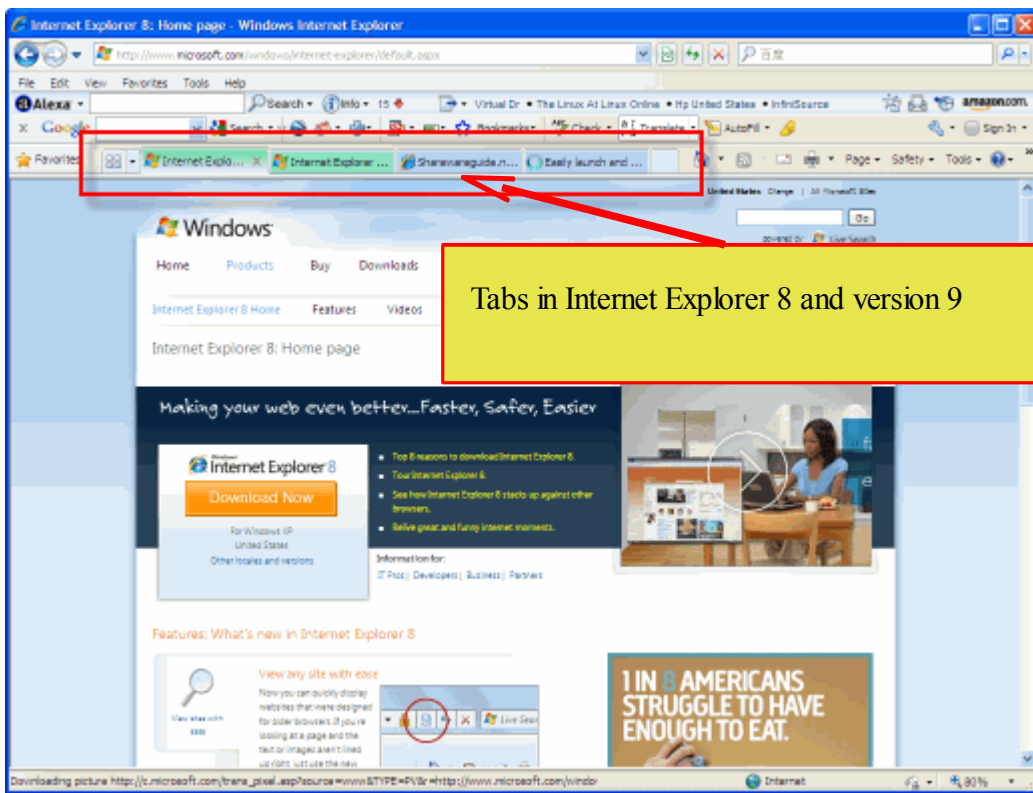

Close Tabs With Your Mouse Wheel.

When browsing the Internet, chances are that you may have at least 3 to 6 tabs open in the web browser.

Tabs were introduced to **Internet Explorer 8, Firefox, Google Chrome and Opera** in 2009 and 2010.

To close one or more of those tabs you need to click the small “x” on the tab.

A quick and easy way is to the mouse cursor over the tab and click with your middle mouse button or wheel.

This works in Internet Explorer, Mozilla Firefox, Google Chrome and Opera Web Browsers.
