

System Sixty Nine

Design

Björn Rust, 2006

Description

System Sixty Nine (S69) is design as a environmentally sensitive, multi functional furnishing system. Constructed of pigmented ARPRO® Expanded Polypropylene (EPP) a Steam Chest Moulded particle foam which requires no residual blowing agents.

Material

ARPRO® Expanded Polypropylene.

Maintenance

System sixty nine can be used outdoors and in contact with water, however it is not recommended that it is left continuously exposed to UV light. It is structurally resilient, only extreme mishandling to its corners may result in cosmetic damage. Clean with a damp cloth.
