<b>Sony</b>		
<b>Teac</b>		
Teac DV-W516G	Yes	No
<i>NB: This is a NON-exhaustive list. Many OEM's and variants will function with parity scanning options that are not listed here. A small OEM key has been provided. If a drive brand is listed and coded "red" for example, it will work as a LiteOn drive should - supporting all LiteOn scanning functions. The end user should exercise caution and research, before considering purchasing an OEM version drive.</i>	Key	LiteOn/MTK OEM
		NEC OEM
		BenQ/Nexperia I/II OEM
		Pioneer OEM
